

KITTEN INSTINCTIVE¹²

Small tender chunks for 2nd age kittens.
Also suitable for gestating queens.

Available in a box
of 12 x 85g pouches

or as an
individual pouch

From 4 to 12 months old

Because the 2nd age kitten's growth continues but at a slower rate:

- The kitten prefers a specific **Macro Nutrient Profile** (see page 4).
- The kitten's bone structure is consolidating. Energy needs remain high, although slightly lower than 1st age kittens.
- Permanent teeth appear.
- The 2nd age kitten now has its' own immune system, however **its' natural defences remain fragile**.

NUTRIENT PREFERENCE

2nd growth period

KITTEN INSTINCTIVE¹² has been perfectly formulated to match the optimal Macro Nutrient Profile* instinctively preferred by 2nd age kittens.

Easy chewing

The size and texture of the chunks are perfectly adapted to the kitten's jaws.

Natural Defence

Helps to build the kitten's natural defences thanks to mannan-oligo-saccharides and an antioxidant complex** (vitamins E and C, taurine and lutein).

Portion table

KITTEN INSTINCTIVE ¹²		+KITTEN 36	
Age in Months			1x  +  (g)
1	350 - 600g	1 1/2 - 2	5 - 15
2	800g - 1.2kg	2 - 3	20 - 35
3	1.4 - 2.1kg	3 - 3 1/2	30 - 50
4	1.8 - 2.75kg	3 - 4	35 - 55
6	2.4 - 3.9kg	3 - 4 1/2	35 - 60
9-12	2.9 - 5kg	3 - 4 1/2	35 - 60
Gestating queen on demand	3kg	3	35 - 55
	5kg	5	70 - 110

Depending on the kitten's weight () there are 2 options:

- 100 % chunks: , for example 4 1/2 = 4 pouches + 1/2 pouch
- A mixture: 1 pouch
+ Kitten 36 kibble (g) 

INGREDIENTS : meat and animal derivatives, cereals, vegetables protein extracts, derivatives of vegetable origin, milk and milk derivatives, oils and fats, minerals, yeast.
